## Moses Coulee Basin - WRIA #44

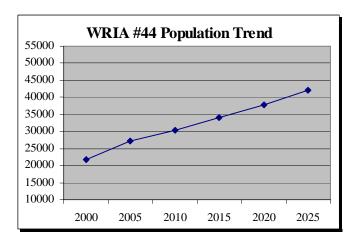

# **Watershed Description**

WRIA #44 encompasses nearly 730,059 acres and is located within the Columbia Basin ecoregion. This watershed receives only 7 inches of rainfall per year. The scablands and loess islands were formed as immense floods periodically broke through the ice dams blocking glacial Lake Missoula during the Pleistocene. Soils are typically deep loess on hills and foothills. Potential natural vegetation is big sagebrush, bluebunch wheatgrass, Idaho fescue, and three-tip sagebrush.

### **Population**

There are approximately 24,505 people living in the Moses Coulee Basin. The primary population centers are East Wenatchee and Waterville. The majority of people live in unincorporated areas. The population graph reflects the combined projected population of those counties located within the watershed (Office of Financial Management population projections).

Counties	% of basin	
Douglas	93%	
Grant	7%	

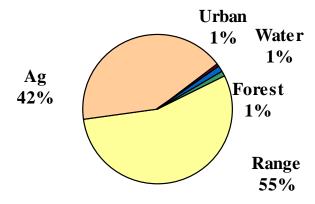

Tribal Reservation Lands in WRIA #44
none

**Land ownership for WRIA #44** includes federal, state, and private lands. Data was derived from the Public Lands Survey by Washington Department of Natural Resources (DNR).

Land Ownership	Acres	Proportion
Federal	40,351	5.5%
State	61,06	8.4%
Local	0	0%
Tribal	0	0%
Private	628,646	86.1%

**Land use** in the Moses Coulee Basin is mainly range and agriculture related uses. The general type of known land-use activities within the watershed is graphed according to the percentage of its occurrence.

# **Land use in the Moses Coulee Basin**

The primary towns and cities in WRIA #44 include East Wenatchee, Waterville, and Rock Island.

#### **Legislative and Congressional Districts**

To determine your region's legislative or congressional district, see:

http://www1.leg.wa.gov/DistrictFinder/Default.aspx

To determine Latitude/Longitude coordinates, see:

http://www.topozone.com/

(Make sure you set the button on the bottom of the page to D/M/S - hold the cursor over a spot on the map and the coordinates show at the bottom of the screen.)

Several federal programs refer to watersheds according to their Hydrological Unit Code (HUC). To learn more about your watershed and determine which **HUC** your town or county is located in, see:

http://water.usgs.gov/wsc/

# **Water Quality**

#### Water Quality Assessment

The statewide Water Quality Assessment categorizes waterbody segments that have water quality data available. The Simple Query Tool and interactive mapping tool allow you to search for specific categories, water bodies, pollutant parameters, and other information, in whatever combination you choose. **WRIA** #44 has two (2) known Category 5 (impaired) water bodies.

To view the Water Quality Assessment, use the Simple Query Tool.

http://apps.ecy.wa.gov/wats/WATSQBEHome.asp

To view the Water Quality Assessment by Category, choose the Category (1-5) you are interested in from the drop down box. To view it by Water Resource Inventory Resource Area (WRIA), choose the WRIA number you are interested in from the drop down box.

Use the Interactive Mapping Tool to see a graphic representation of the Water Quality Assessment. This is a Geographic Information System (GIS) application that helps you find waters you are interested in and information about problems in that water body.

http://apps.ecy.wa.gov/wgawa/viewer.htm

## **Domestic Water Supply**

No significant use of surface water sources. For further information regarding water supplies, see:

http://www.doh.wa.gov/ehp/dw/default.htm

#### Salmonid Stock Status

Good water quality is important to help salmon survive and thrive. To find out which salmon species are listed as threatened or endangered in a region, see:

### http://www.governor.wa.gov/gsro/regions/map.htm

## Air Quality

Water quality can be affected by air quality; for example, windblown dust from construction sites or bare, dry agricultural lands, especially fallow fields, may be transported to waterways. For information about air quality, see:

http://www.ecy.wa.gov/programs/air/aginfo/Windblown\_dust\_information.htm

### TMDLs and Other Watershed-Based Plans

For information about Total Maximum Daily Loads (TMDLs) in your area, see:

http://www.ecy.wa.gov/programs/wg/tmdl/

To learn more about watershed planning in Washington State, see:

http://www.ecy.wa.gov/watershed/index.html
